DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Amendment, filed 6/24/10, with respect to claims 2-6, 9-10, 14, 16-17, 19, 22-23, and 25 have been fully considered and are persuasive. The previous rejection has been withdrawn.

Allowable Subject Matter

2. Claims 2-6, 9-10, 14, 16-17, 19, 22-23, and 25 are allowed.

3. The following is an examiner's statement of reasons for allowance: The present invention comprising synchronization data between communication devices. None of the prior art teaches or suggests generating a data signal having a transmission period on a first line, the data signal sent at a first instant from a transmitter block to be received by the receiver block; generating on a second line a congestion signal sent from the receiver block to the transmitter block when a congestion event of the receiver block occurs in order to interrupt the transmission of the data signal; and generating on a third line a synchro signal sent at a second instant from the transmitter block, this synchro signal indicating to the receiver block that the data signal on the first line comprises a new datum, wherein the congestion signal interrupts also the transmission of the synchro signal when a congestion event of the receiver block occurs, and wherein the second instant for sending the synchro signal for communication over the third line is delayed with respect to the first instant for sending the data signal for communication over the first line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
